

PRODUCT SHEET - PVC SLATS

Our slats are produced out of the highest quality Polyvinylchloride (PVC). Three hollow chambers filled with air give the slat a strong buoyancy. The silicone glued end caps make our slats water resistant. The standard colour of our Polyvinylchloride slats is white. Other colors can be requested.

Color	Standard white
Material	Polyvinylchloride (PVC)
Dimensions	65 x 16 mm
Weight per M²	4.0Kg
Buoyancy per M²	4.8Kg
Isolation value	0.151 M ² K/W
U-Value	3.5 W/M ² .K
Model	Hollow chamber profile
End caps	Glued (with silicone)
Temperatures	-10°C to 50°C
